

Jesse Nicolas

Full Stack Software Engineer

Reno, NV | (925)864-4567 | jessegnicolas@outlook.com | [GitHub](#) | Portfolio | [LinkedIn](#)

I am a dedicated problem solver and lover of fixing things, seeking a role as a software engineer. I enjoy working with and communicating complex ideas to build practical, user-focused products. My experience in education, logic, and ethics has allowed me to develop the skills to be an effective engineer and teammate. I have a deep appreciation for elegant solutions and designs, and I strive to create in a way that reflects such minimalism and utility.

SKILLS

- JavaScript, React, Python, Django, CSS, HTML, NodeJS, MongoDB, ExpressJS, Docker.

RELEVANT EXPERIENCE

Software Engineering Immersive | General Assembly | Remote | August 2022 - November 2022

Developed projects, including:

- **Discography:** A Django project developed with Docker and using a Postgres db. | [Git Repo](#) | [Deployed Link](#)
- **TahoeJesse:** A MERN task manager/client portal for a property management business. | [Git Repo](#) | [Deployed Link](#)
- **Snake:** Built with only HTML, CSS, and JavaScript. | [Git Repo](#) | [Deployed Link](#)

Logic Tutor | University of Nevada, Reno | Department of Philosophy | August 2021 - May 2022

- Instructed students in how to analyze the logic of arguments, write logical expressions, and construct proofs out of symbolized logical statements. Provided verbal opposition to students for argument analysis/reconstruction in their philosophy essays, helping them develop better argumentation skills.
- Managed my own schedule and planned one-on-one meetings with students at their request; and developed my own lessons with the ability to adapt them to the needs of my students.

Server | Black Angus Steakhouse | Brentwood, CA | February 2018 - March 2020

- Coordinated excellent customer service among a staff of 30+ people at a time. Created a relaxed environment for guests with a friendly presence.
- Served as unofficial 'handyman' during slower hours; management would usually give me odd jobs around the restaurant such as changing light bulbs, applying varnish to patio furniture, etc.

EDUCATION

General Assembly | Software Engineering Immersive | Remote

- Successfully completed 500+ hours of expert led instruction in object-oriented programming, building full-stack web applications, and using front-end frameworks.
